

Infection Control and Patient Journey Post COVID-19

Patient Journey at Artisan Implants

At Artisan Implants your health and safety is our priority. We understand that the patients will want to have confidence that their dental practice is adopting all necessary infection control protocols to keep them safe. Keeping this in mind we have adopted a few steps.

Our team at Artisan Implants have tried to minimise the likelihood of transmission of infection from **staff to patient**, **patient to staff** or **patient to patient** by introducing reasonable control measures along your route.

Patient Attendance Procedure

This procedure explains in detail the journey from the moment you arrive **outside** the practice to the point where you **exit** the building.

Use toilet before attending the practice

Bring minimal belongings and strictly no valuables

Must attend alone unless absolutely necessary

You will be met by a team member wearing appropiate PPE

Only enter the building when summoned by phone

Wear a face covering if you are vulnerable

Your temperature will be checked

Screened again using standard COVID-19 questionnaire

If now in Category1 you will be requested to leave

Payment taken in advance

Medical history will be checked

Will be offered and requested to use a hand sanitizer

Belongings placed in a designated area

Escorted into the surgery

Following the procedure you will leave the surgery room immediately

Escorted to the practice exit

Collect your belongings

Use hand gel
